What is Drop Shot Mod and what is Jump Shot Mod?

When drop-shot is enabled, and you fire your weapon, your soldier will automatically drop to the ground - making it very difficult for your opponent to shoot you, as he is left shooting in the air where you used to be! When jump-shot is enabled, and you fire your weapon, your soldier will automatically jump up in the air - throwing your opponent's aim off.

How does Drop Shot or Jump Shot work?

- First, enable the mod by holding the mod switch and tapping the B button (In Default Button Layout). LED3 or LED4 will illuminate.
- To initiate a jump shot or a drop shot, just press the fire-weapon button. Your soldier will jump or drop according to the mode you are currently in (see below).

How do the different Drop Shot and Jump Shot modes work?

To change drop/jump shot to a different sub mode:

- Hold the mod switch and hold the B button, then count the number of times the LED blinks.

Four different modes are available:

Mode 1 Drop shot. A soldier drops automatically when you fire.

Mode 2 Drop shot. A soldier drops automatically when you fire, except if you are scoping.

Mode 3 Jump shot. A soldier jumps automatically when you fire.

Mode 4 Jump shot. A soldier jumps automatically when you fire, except if you are scoping.

To turn off Drop or Jump Shot:

- Hold the mod switch and then tap the B button.

You can always **turn all exclusive mods OFF (Player 3 and 4 LED's)** by holding down mode switch on the back and tapping A Button.

What Games Is Drop Shot Mod Compatible With?

Drop Shot and Jump Shot Mod is compatible with all Call of Duty games.
